lb (7.8 t). This compact but powerful machine is ideally suited to smaller yards with constricted space or narrow aisles where maneuverability is essential. Its size also recommends it for under-roof operations such as sorting and

cess of different materials. It offers interesting benefits for increased material quality, reduced maintenance costs, and easy and s

ECO GRATER BY ECO GREEN EQUIPMENT

ECO Green Equipment • www.ecogreenequipment.com

ECO Green Equipment recently announced the latest steel removal technology available for tire recyclers. The ECO Grater, single-shaft shredder churns through scrap tires, up to 12 tons per hour, while outputting clean 1-inch minus wire-free rubber mulch. This unit features a lower processing speed, reducing heat and saving energy. A new remarkable knife design boasts one of the lowest wear costs in the industry. For more information call: (801) 505-6841 USA.

BM&M's Super Gyratory Screens are built as a flexible solution for the recycle industry. The Super Gyratory Screen's unique design is dynamic and allows for greater screen life and higher capacities than conventional screens. The Super Gyratory Screen is available in sizes starting from 4.5 sq.ft. up to 72 sq.ft. Performance guarantees are available upon request.

CAT® MH3000 MATERIAL HANDLER

more about the Cat MH3037, MH3049 and MH3059.
Caterpillar Inc. • www.cat.com/MH3000

New Cat® MH3000 series wheel material handlers feature innovative cab-to-ground hydraulic cab risers that improve the safety and comfort of your operations. Increased strength and durability with continuous top and side-plate construction throughout boom and stick, improved productivity and faster cycle times with excellent control, thanks to open-center load-sensing hydraulic system and rear camera monitor and space-saving joystick steering enhance safety and visibility. degree oscillation feature. To learn more contact Buffalo Turbine at visit www.buffaloturbine.com.

Buffalo Turbine • www.buffaloturbine.com

To further reduce a customer's cost with environmental compliance and increase productivity, Buffalo Turbine adds an all-new Diesel Monsoon Diesel to their inventory of Monsoon dust and odor control systems. A Tier 4 compliant 3-cylinder, liquid cooled diesel with air cleaners and both hydraulic shutoffs, dual six gallon

BATEMAN "AUTOGATOR" AUTOMOTIVE DISMANTLER

Designed for 150 or 200 class excavators, the Autogator can get your dismantling procedure out of the swamp! The Autogator is known for both precision and immense jaw power. By using the synchronized jaws, aluminum radiators, condensers and A/C components can be rapidly removed. Implement the "death roll" to remove wiring and other loose/stringy material. Maximize the value of end of life vehicles! Engines and transmission can be plucked out in one shot and don't forget to put the catalytic convertor in a separate pile! The Autogator is a sound investment utilizing the least amount of labour possible; no piece of high value material will be overlooked!

ing processors a multitude of options depending on their specific needs. All options include knives that can be reground for multiple reuses, reducing operational costs. All rotors are through hardened for increased wear and are designed with CM's exclusive "removable rotor technology" for easy removal and changes due to wear or damage. Removal panels on the hopper provide access to reduce the time to change knives. If your shredder is not cutting it, contact CM to discuss the benefits of the CM Hybrid.

NEW! SATURN® G-4X REFINER MILL DESIGN FOR CRUMB RUBBER

The Saturn G-4X, is a next generation company's popular G-4 refiner mill for crumb rubber. It features a completely unique sealed roller design that provides significant benefits over the traditional bushing design mills. The design enables the ability to hold the rolls at much closer tolerances (less than 0.001 inches), which translates to exceptional quality and higher production capacity of asphalt quality crumb rubber.

Saturn G-4X's sealed bearing design also virtually eliminates the need for frequent maintenance and downtime. The initial cost of the Saturn G-4X is approximately \$25,000 per month. Retrofit upgrades for Saturn G-4's are available. Granutech-Saturn Systems • www.granutech.com/saturn-g4-industrial-refiner-mill
